

PU HOSE PIPE

Shreeji Techno Innovations provides a wide selection of Pu Hose pipe, including Silicone Coated Hose Pipes, High Temperature Hose Pipe leading supplier of hose pipes in the market. Considering the massive requirements of the most advanced technologies in the industry, Shreeji Techno Innovations manufactures supplies & exports the most innovative range of PU Hoses.

The standard PU hoses have been made with premium polyurethane materials. They feature copper plated spring steel spiral that is embedded in their construction. They are abrasion resistant and have a long life.

Designed PU Hoses with the use of the latest equipment, the hoses have tensile resistance. They are comparatively far stronger than any other ordinary products.

The superior hoses are remarkably flexible as they have the strength to remain elastic even below 0-degree Celsius. They are halogen free and physiologically safe.

The ultra-flexible hoses feature so many designs. They come in various sizes and models. They are used in several industries such as, textiles, plastic, ceramic, printing, paint industries and more.

SPECIFICATION

Size	: 32mm to 400mm & Above
Standard Length	: 10mtr., 15mtr., 20mtr.
Color	: Transparent
Temperature Range	: -40°C to 90°C (+125°C short term)
Options	: Size as per your requirement

FEATURES

- Ultra-flexible even below 0-degree Celsius
- Tensile resistant
- Abrasion resistant
- Premium polyurethane material
- Halogen free

APPLICATIONS

- Textiles
- Plastic
- Ceramic
- Printing
- Paint Industries
