

## ALUMINIUM COATED FIBERGLASS FABRIC

Shreeji Techno Innovations is an esteemed organization that is leading in the field of manufacturing, supplying and exporting Aluminium Coated Fiberglass Fabric & Cloth and Aluminium Foil Coated Glass Cloth. The superior construction along with the cutting-edge technologies is the hallmark of the fiberglass fabric.

With the use of retardant adhesive, the fiberglass fabric forms a highly dense composite film. It comes with light reflectivity and has relatively large longitudinal and transverse tensile. The fabric is waterproof and has a pretty smooth surface.

Aluminized Fiberglass Cloth – The standard fabric is available in many exclusive designs and models. It is carved on particular specifications provided by clients as well. Made with premium materials, it is known to be not only durable but also excellent in providing maximum output.

Its applications are found in a number of industries including air conditioning, HVAC equipment, pipe insulation, and building materials.

### FEATURES

- Light reflectivity
- Waterproof
- Transverse tensile
- Smooth surface

### APPLICATIONS

- Air conditioning
- HVAC equipments
- Pipe insulation and building materials
- Oil pipes, steam pipes
