

FIBERGLASS CLOTH

Shreeji Techno Innovations manufactures quality fiberglass cloth. Made with latest technologies, the woven fiberglass cloth offers the perfect control over the thickness and weight of all types of fiberglass textiles.

Shreeji Techno Innovations is the largest manufacturers & suppliers of Fiberglass Cloth, Woven Fiberglass Cloth, carbon fiber fabrics & carbon cloth and well recognized and Exports, Supply all Over. With high tensile strength, the fiberglass cloth is very durable. As compared to steel wire of the same diameter, it has far greater tensile strength. It has comparatively very low elongation under load-3% or even less. It is known to provide superior dimensional stability under any testing conditions.

It has high heat resistance as it is equipped to retain about 50% of room temperature. Made with inorganic materials, it is incombustible and fire resistant. Having good thermal conductivity makes it very significant in electrical insulation applications.

The cloth is available in several designs and models. It is modified as per particular specification as well. The advanced cloth is used in a number of applications such as, electronics, Adult Games commercial and construction, marine and recreation, filtration and more.

As the major supplier & exporter of fabrics, we are equipped with most advanced technologies to produce excellent products.

FEATURES

- Extremely durable
- Fire resistant
- High tensile strength
- Elongation under load-3% or even less

APPLICATIONS

Electronics
Construction
Marine and Recreation
Filtration
