

HIGH SILICA CLOTH

Shreeji Techno Innovations has been known to manufacture excellent range of High Silica Cloth and Fabric, High Silica Welding Blanket and High Temperature Silica Fabric and cloth. The silica cloth contains 90% silicone dioxide.

With the ability to withstand continuous temperature of 900-degree Celsius and most significantly, the instantaneous temperature of 1400-degree Celsius, the silica cloth is highly heat resistant. It has been made to be suitable for rocket and missile manufacturing in the aerospace industries.

The yarn and filtration mesh pieces that are treated with the use of high resistance coating. They are perfectly suitable for heat preservation materials as well as fire fighting equipments such as fireproof garments. They are excellent in dust collection and filtration equipments.

The cloths are found in a comprehensive range of models. They are designed in keeping with individual specifications as well. Being the foremost supplier & exporter, we ensure our manufactured products exemplify the true standard.

FEATURES

- Highly heat resistant
- 90% silicone dioxide
- Excellent output
- Incredibly durable

APPLICATIONS

Welding/cutting protection
Molten metal splash protection
Heat and flame shielding
