

WELDING BLANKETS

Shreeji Techno Innovations is an acclaimed manufacturer, supplier & exporter of a superior range of Welding Blankets. The industry-first design coupled with the exemplifying technologies is the most significant components of the blankets.

The welding blankets are perfect replacements for asbestos products which are used for heat protection as well as thermal insulation. It has been designed to be suitable with the temperature up to 550°C.

The blankets are made to protect employees from welding hazards. There are several treatments like, graphite coating, vermiculite coating and heat coating.

They are equipped to reduce the intensity of molten metal. Apart from being available in multi-designs and models, they are customized as well to meet specific demands.

The advanced blankets are exceptionally used many applications such as, refractory, boiler, steel, aluminum and welding.

APPLICATIONS

Refractory
Boiler
Steel
Aluminum
Petrochemical
Pulp and paper
Shipyards
Fire departments
Welding
Automotive
Anywhere heat protection is required

FEATURES

- Suitable for temperature up to 550°C
- Different treatments – graphite coating, vermiculite coating and heat coating
- Multi-designs and models
- Superior quality
