

SILICONE COATED FABRIC TAPE/BELT

We are manufacturer & supplier of Silicone Coated Fabric Tape/Belt. This Silicone Coated Fiberglass Fabric Tape/Belt is high temperature & corrosion resistance so it is use industrial Applications. Backed by the most advanced technologies, Shreeji Techno Innovations exports highly versatile and efficient Silicone Coated Fabric/Tape/Belt.

Equipped with the latest features, the standard coated fabric is capable of releasing property under testing temperature. It emits viscous materials that adhere to fluorocarbon.

The standard coated tape is resistant to moisture, sunlight, mineral lubricating oils, air, non-oxidizing acids, mild alkali etc. With incomparably high abrasion resistance and flexibility, the coated belt is highly durable and is able to provide maximum.

The coated fabric is available in a great many exclusive models and different sizes. Moreover, it is modified or customized in harmony with the specifications presented by the clients.

The coated belt finds its applications in so many industries due only to its superior performance. As for instance, chemical, cement, oil industries, iron, safety curtains and more.

FEATURES

- Ultra-modern design
- Abrasion resistant
- Very small bending radius
- Resistant to moisture, sunlight
- Supremely strong

APPLICATIONS

- Chemical
- Cement
- Oil Industries
- Iron
- Safety Curtains
- Petro Chemical
