

SILICONE COATED SLEEVE

Shreeji Techno Innovations manufactures and exports innovative Silicone Coated Sleeve. It is also known as Fiberglass Coated Sleeve, Fiber Tube and Silicone Rubber Fiberglass Casing. In keeping with various industrial needs and the ever-increasing demand to produce exceptional products.

Made with superior materials, the fibre tube is capable of maintaining its flexibility at high temperatures. Constructed with the use of inflammable materials, it is fire resistant too. Besides, it has been engineered to be highly durable as it is equipped to resist moisture, damaging chemicals. It has the ability to shield molten splash and welding splatter.

In harmony with the various demands, we manufacture the silicone coated sleeve in several models and designs. With all the latest features and modern technologies, the fiber tube is unsurpassed purely based on performance. It is used as a protective sleeve in many applications such as industrial hoses, cables and wire, aviation and marine fuel.

FEATURES

- Fire resistant
- Temperature resistant
- Chemical resistant
- Highly durable and flexible

APPLICATIONS

Industrial hoses
Cables and wire
Aviation and marine fuel
